U. S. Patent and Trademark Office PTO-326 (Rev. 3-97)

Part of Paper No.

Serial Number: 09/628,396 Page 2

Art Unit: 3634

Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, lines 6-11, the phraseology is not readily understood by the Examiner. Specifically, it is not readily understood by the Examiner what is meant by "a first graphical shape representative of known obstructions normally within a defined field". Furthermore, it is not readily apparent to the Examiner what is meant by "said controller operable to construct a second graphical shape in response to an unknown object entering with said defined field". In claim 10, lines 7-8, it is not readily understood by the Examiner what is meant by "said map signature having a first graphical shape representative of known obstructions normally within said defined field". In claim 14, lines 6-7, it is not readily understood by the Examiner what is meant by "a first graphical shape representative of known obstructions normally within said defined field". In all of the instances, "what are known obstructions" and "what is defined as normal"?

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

As best understood, claims 1, 2, and 4-20 are further rejected under 35 U.S.C. 102(e) as being clearly anticipated by Zhang et al. Zhang et al disclose an object detection system and the method for detection for a vehicle comprising an emitter having a pulse/ultrasonic signal mounted

Serial Number: 09/628,396 Page 3

Art Unit: 3634

to a vehicle window frame, a receiver mounted to a vehicle window frame, and a controller for mapping a detection area.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

As best understood, claim 3 is further rejected under 35 U.S.C. 103(a) as being unpatentable over Zhang et al in view of Trett et al. All of the elements are discussed above except providing the emitter of Zhang et al to be an electromagnetic signal. Trett et al discloses a detection system comprising emitters having an electromagnetic signal. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide the emitter of Zhang et al to send an electromagnetic signal as taught by Trett et al since an electromagnetic signal is a faster and more sensitive signal.

Applicant's arguments with respect to claims 1-20 have been considered but are moot in view of the new ground(s) of rejection.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE

MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Serial Number: 09/628,396 Page 4

Art Unit: 3634

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. German patent to Wurzle discloses elements similar to that of the applicants invention.

Any inquiry concerning this communication should be directed to Jerry Redman at telephone number (703) 308-2168.
